Director of Water Operations Report

- Water Quality
    - Sanitary Survey scheduled. Preparations underway.
    - December “full spectrum” water analysis.
- Major Infrastructure
    - Wells 1 & 2 (Mooney and Peterson)
        - Conducting *Well Health Checks* (Mooney Well prioritized)
        - Ensuring continued redundancy of water supply (Mooney Well) to support State sanitary survey.
    - Storage Tank 1 (Steel Tank)
        - Pursuing Tank Inspection. Identifying sources and requesting quotes now that cooler weather has arrived.
    - Well Depth - no significant changes.
- Meter Standards Committee: plan to convene subject matter and industry experts to develop standard configuration for all future meter installations.
    - Committee approved Sep 12. Including Collins (Director), Holmes (Director), Parli, Dimmock.
    - Conducting "Potholing" to support updates to *Meter Dashboard*.
- Support to Water Operations
    - Waste disposal solution - District dumpster approved Sep 12.
    - Specialized Tools: need for hydrant cap wrenches, long handled valve wrenches.
    - Security: additional locking devices for District infrastructure.
- Volunteer Activities
    - Recognition of volunteers September - November.
    - (Proposed Action) Call for Volunteers - Steel Tank level board needs to be replaced. Email sent soliciting volunteers.
    - (Proposed Action) Waterworks Day 2027 - approved and scheduled for January 16, 2027.
