

Canebrake County Water Board - Equipment report

September 6, 2026

Equipment activity log and building maintenance -

By Daryl Holmes

DUMP TRUCK (BETTY)

Latest Review 7/1/2026

Brand Ford

Model F600 Dump truck

Fuel pump replaced..... Josh and Daryl troubleshooted non-start issue... Determined carburetor has a stuck float limiting fuel to the engine... As season cools Daryl and Josh will repair carburetor and get dumptruck running.

GOLF CART

Brand EZGO

Golfcart runs ok.... Needs a new windshield..... Canopy repair needed. Daryl and Roberto will handle when weather cools. .

BACK-UP Generator

Brand Hardy Diesel

Condition Good

In October, plan is to activate and run generator and remote power Peterson Well. Daryl and Travis Harr will schedule event and advise board of activity date.

FORD RANGER Water District Pick-up

Latest review 6/2026

Hard start situation. Vehicle previously ran in June 2026. Josh and Daryl will troubleshoot. Issues with neutral safety switch and shifter. Recommending that truck is sold in 2027

CAT 239D TRACK-STEER

Last review 8/29/2026

Per Holmes request Chris MacDonald started unit and exercised all hydraulics, checked fluid levels. Unit is in great shape and is prepared for season work. Holmes operated the unit August 29 for 2 hours for grading and surface work at Parli's property. New filters have been purchased and will be replaced in October.

D4 CAT Bulldozer

Holmes has been in contact with Hawthorne Caterpillar to determine our ability to disperse of the unit. Our CAT representative explained that the bulldozer is considered illegal to operate in the state of California since an emissions act was passed in 2005 deeming the unit obsolete and unsaleable. Holmes has reached out to Roberto to see if someone in Mexico will want it. Andria may have a lead on an individual who may want it for parts. Hawthorne CAT explained the state fines are hefty if it is used by CCWD or sold to a California party. Most likely the outcome would be a yard art non-operational role and given away.

CAT 303.5 Excavator

Last review 8/2026

Per Holmes request, Chris MacDonald started the unit and exercised all hydraulics per procedure. Fluid levels were checked. The unit is in great condition and prepared for upcoming season work. Filters were purchased by Holmes and will be replaced in October.

EQUIPMENT OPERATORS

The following Canebroke community individuals have been qualified trained and approved by workers compensation insurance as only individuals to use Canebroke equipment, Track Steer

and Excavator.

Chris MacDonald – CCWD Employee

Stephen Fillmore

Daryl Holmes

Jeff Burnworth.

Ron Akey

Roberto Munoc – CCWD Employee

COMMUNITY BUILDING CONDITION AND USE

Trash is an issue for CCWD. There are several 55 gallon canisters in the equipment sheds with various materials and trash that need to be disposed of. Holmes will handle and haul off in October with Chris MacDonald's help.

(Possible Action) Holmes recommends that CCWD has their own trash service with unlimited construction type usage. Ramona Waste disposal can provide that. Trash disposal will increase as poly pipe is replaced during the upcoming season.

Sprinkler automation has been installed and is in current use. Bill Dimmock and Holmes have remote capability to use the system and have seen a significant improvement in landscape growth.

Respectfully submitted,

Daryl Holmes Jr.

September 6, 2026

As always "THANK YOU" to Mr. Ron Akey. Our community is blessed for all his assistance with maintenance repairs, fuel delivery and his dedication caring for our equipment
