

Overview of proposed Equipment Building (Buchheit Bungalow)

Darrel Homes
Bill Dimmock

Scope:

To Construct a building to house the Canebrake Water District to include:

- A water tight building
- Capable of the building being rodent free.
- Storing all equipment.
- Storing all material.
- Work shop
- Office

Plan would be to remove Carport and the building on the eastside and install 30'X 40' build in the same location. (Foot print)

Remove

Install new building to the east side of current building in the same foot print as the building removed

Building 1 30'x40'

2- 10'x10' doors on north and south end of building
6 Windows on east and west side of building

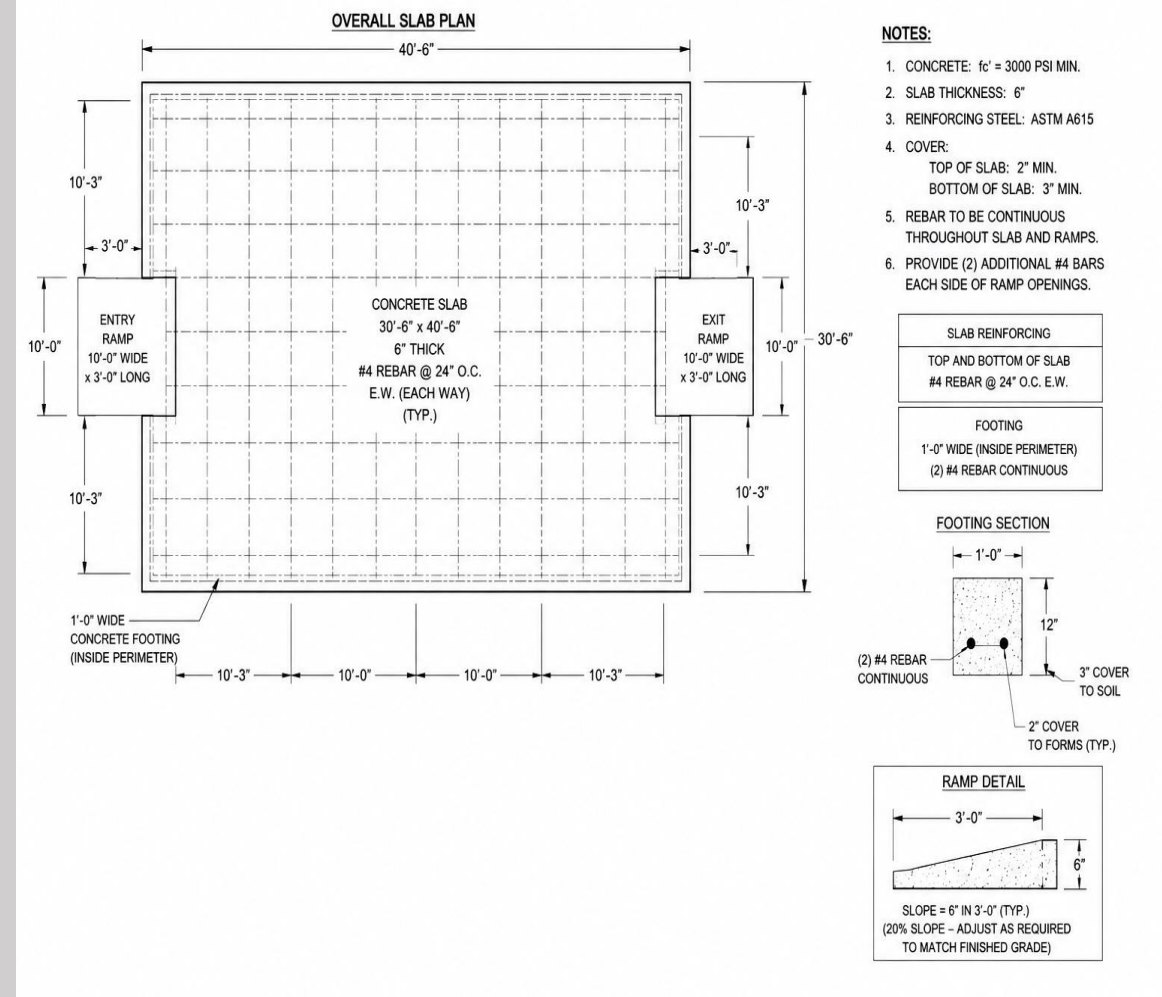

Building 2 30'x40'

2-10'X10'
8 windows 2 on the West, North, East side of building

Things to do :

- TBD Secure funding
- TBD Send in deposit
- TBD Demo Building and Concrete footings
- TBD Pour slab 30''6'' X 40'6'' slab
- Permit ???

Slab Detail

Note entry ramps will change depending on building entry points

Estimated Cost: Per Quotes

- Building \$34,426
- Demo for concrete footings \$2,500
- Slab \$15,000 to \$17,000

- Estimate total 53,926.00

- Note once approval of design is accepted We can have firm cost
