

Onsite System Status Signs

Background

We have three management ways to notify patrons in the Community:

- **Email System** - by posting content on the canebrake website
- **Community Center** - by printing content and posting on front door
- **Door to Door** - by the water manager present at Community visiting patrons

Issue

Patrons and guests visit Canebrake and do not read their email or go to the Community Center to check the status of Water and other Conditions. Some households have two families and are not on the email distribution list.

Difficult to track them down Door to Door because they arrive at all times of the day and sometimes park their car in the garage so hard to spot them in a timely manner.

Augmented Solution

Leverage signs posted at entrances and at central corner locations to notify arriving patrons and patrons already resident when the condition exists.

Install stands at locations within Canebrake but not visible from S2. Allow signs to be swapped or removed. Signs have message on both sides. Font big enough to read from a moving car. No sign needed if no water issues.

Sign stand - steel. Allows for more than one sign to be attached.

Attachable without a wrench (eg Wing nuts).

| Main Uses Cases | Message |
|---|-------------------|
| Parts of the Water System Shut off due to Repairs | Water Off |
| Coliform or E-Coli Positive test results | Boil Water |

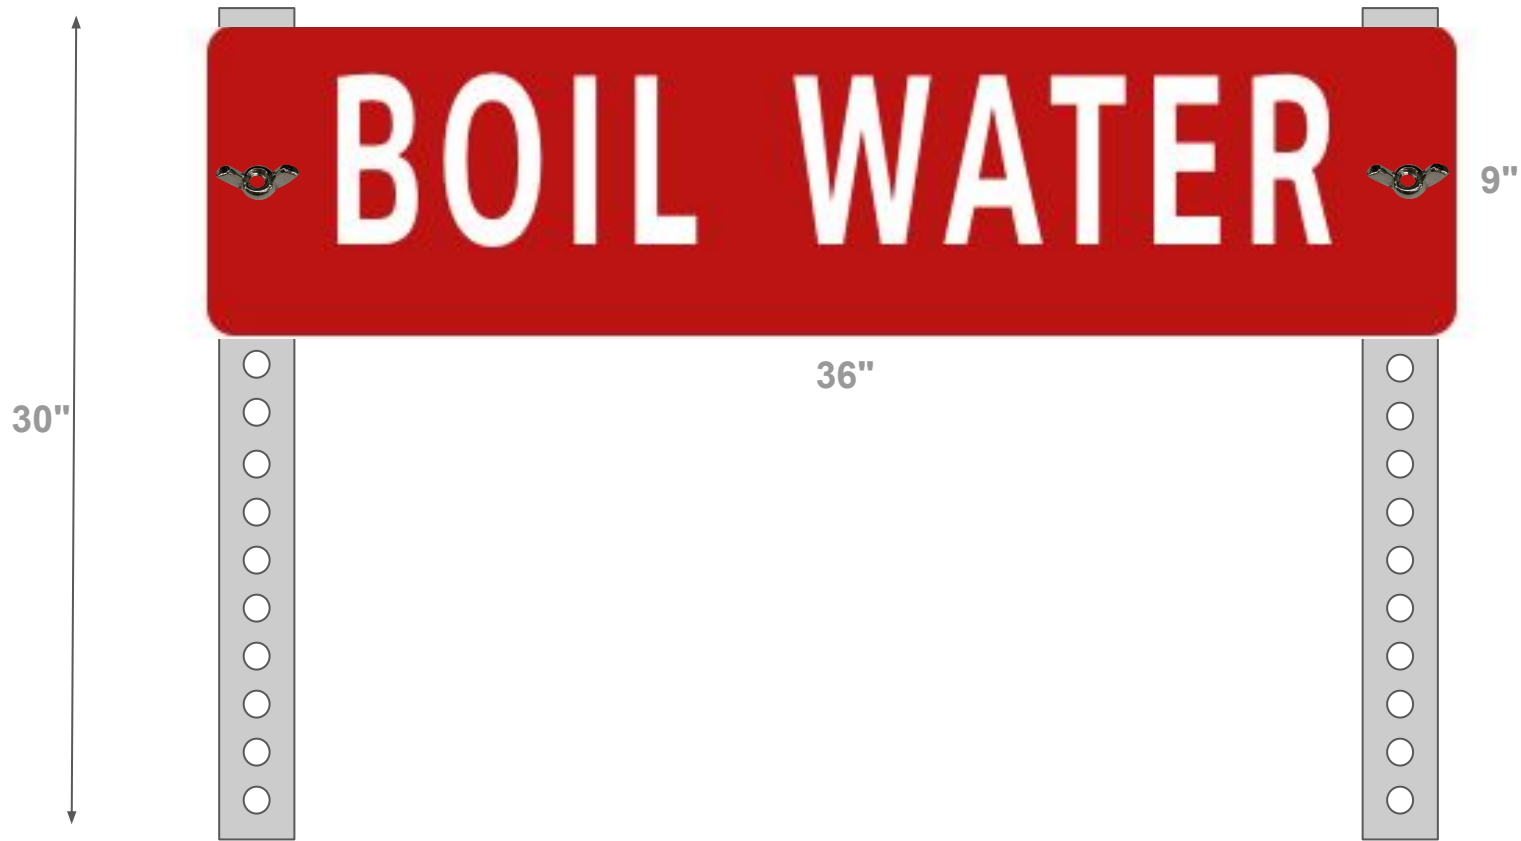

| Secondary Uses Cases | Message |
|--|---------------------------|
| Emergency Use Only - Natural Disaster, Fire, Pump Broken, Need water for non-drinkable reasons | Limit Water Usage |
| Water is dangerously unhealthy. | Do NOT Drink Water |

Sign Locations

RED Locations is Version 1

Later if needed could add more signs at BLUE locations.

- [Steel angle irons](#) as posts (hammered into the sand, no cement necessary)
- Two posts per sign to support windy weather.
- Wing nuts to attach (no wrench needed to attach signs).
- Signs printed both sides (visible from both directions).

| Speed Limit | Blank Height | Letter Height |
|----------------|--------------|---------------|
| 25 MPH or More | 9 inches | 6 inches |
| 25 MPH or Less | 6 inches | 4 inches |

[reference](#)

- We use **.080 5052-H38 flat aluminum** and **.090** aluminum extrusions for our customized street signs for sale

BID #2

<https://ezstreetsigns.com/>

\$53 per sign, includes shipping

Substrate: aluminum

9" X 36"

Your choice of color and lettering.

Printed on one side only.

Not reflective paint.

From the Company ezstreetsigns.com

Hello I'm sorry or signs are more for novelty purposes. They do very good outside under cover out of the sun but no sign will last 10 years in direct sun

3 Street Sign SKU: 400 ~~\$149.85~~
9"x36" / Red / Single Sided Non-reflective **\$134.87**
Line 1: BOIL WATER
