Phase 2 of Automation - Remotely Control the Pump

The [Rachio](#) WIFI controller was chosen because it integrates with a Relay that is needed to boost the voltage and amps to turn on the pump motor. Also this company offers a public API software language so in the future more automation can be integrated.

Need Board Approval - Purchase Rachio WIFI Controller, Relay and Enclosure for ~\$300 and reliable internet (StarLink) \$600 hardware and \$120/mo connection
