

**CANEBRAKE
COUNTY WATER
DISTRICT**

June 7, 2024

Dear Mr. Mattson,

On behalf of the Canebrake County Water District, I want to take this opportunity to thank you for your assistance in reworking the water flow at what we call -- Stafford's Crossing. We appreciate the effort you have put in to correct our water flow issue and we look forward to seeing the water run through the culverts the next time it rains.

The work conducted by Kelly Hawes was both creative and professional. We will certainly use him in the future and refer his services to others who need a good construction company.

We welcome you to attend any of our District water board meetings which are held the second Saturday in January, March, May, June, September and November at 9 a.m. in our community center called McKenney Hall (140 Smoketree Lane).

We want you to know the entire community appreciates the effort you have put in to correct our problem. The work completed looks great.

Thanks again!

Jerry Bucheit

President
