Subject: Equipment

Dear Canebrake Water Board,

I would like to offer my services as one of the approved operators for our 239D machine. I have some experience on Bob Cats, Excavators, loaders and dumps. The controls are different on the Cat Equipment. But would just need to practice getting up to speed.

Also, it was a good idea to purchase the Trak-ster all the contractor that do median and small pipeline jobs are moving to a combo equipment setup to include skid-ster/ trakster and a Mini X Excavator. The paving companies will use skid-sters with no tread tires. But most of the companies that do dirt will use Trak-sters here is a few pics of the combo set up... also included is a sweeper, breaker and forks

Thanks for your consideration.

Bill
